# EMPOWERING WITH **EXCELLENCE**

# CHASSIS TRAINING

The Elite+ are purpose-built RCV chassis, designed for the full spectrum of operational needs.

Our technical courses provide an understanding of all the main systems involved in the chassis and for customers who want to be able to diagnose and rectify any chassis related faults.

Our Trainer will cover Euro 6 legislation, the D8K engine, ECU functions and locations, air braking components and function, air suspension components and function, Electronic Braking System (EBS/ABS/ESP), Electronic Levelling Control ELC, and Advanced Driver Assistance Systems (ADAS).

# BODY TRAINING

The Olympus body range comes in Standard and Narrow formats, four different configurations and a range of sizes to suit different collection strategies.

Whether refuse, dry recycling or food waste, our range of RCV bodies allow collection of up to three separate waste streams.

Our course focuses on carrying out routine repairs and maintenance, as well as electrical and hydraulic familiarisation and associated diagnostics.

Content covers body structure and servicing, hopper structure and servicing, electrical systems component and operation, fault diagnosis and repair, pump, valve and ram operations and navigating around the vehicles' electrical and hydraulic schematics.

# EV TRAINING

Our HV training courses offer a comprehensive program designed to equip operators and technicians with the skills and knowledge necessary to efficiently and safely operate Dennis Eagle’s innovative electric RCVs.

With a focus on the unique aspects of electric vehicle technology, the course covers essential topics such as vehicle controls, safety procedures, battery management, and routine maintenance. Participants will gain hands-on experience with the vehicle’s advanced systems, ensuring they are fully prepared to handle the demands of modern waste collection in an environmentally sustainable manner.

This training is ideal for municipalities and waste management companies looking to transition to greener, more efficient fleet operations.

# ON REQUEST TRAINING

If you would like to book any of these courses,  
please contact [customertraining@dennis-eagle.co.uk](mailto:customertraining@dennis-eagle.co.uk)

## Beta 2 Bin lift

This course is designed to provide comprehensive instruction on the safe and efficient operation of the Beta bin lift system. It covers the essential skills needed to operate the equipment confidently, with a focus on safety, best practices, and troubleshooting.

Participants will gain hands-on experience with the Beta bin lift, learning to manage various waste containers and handle different operational scenarios. By the end of the training, you will be equipped with the knowledge to ensure smooth waste collection processes, minimise risks, and maintain high standards of operational safety.

## Olympus Twin Pack

The Olympus Twin Pack Body Training Course equips participants with the skills and knowledge needed to operate and maintain the Olympus Twin Pack refuse collection body effectively. This course provides a detailed overview of the vehicle's dual-compartment system, enabling operators to handle multiple waste streams efficiently in a single collection.

Through a combination of theoretical instruction and practical exercises, participants will learn about the key features, safety protocols, and maintenance procedures required for optimal performance.

## Electronic Truck Steering

Our ETS Steering training course is designed to provide participants with a thorough understanding of the ETS system used in Dennis Eagle vehicles.

This course aims to enhance your knowledge of the ETS system's functions, components, and maintenance requirements to ensure safe and efficient operation.

By the end of the training, you will be equipped with the skills necessary to confidently operate and maintain vehicles featuring the ETS system, ensuring safety and reliability on the road.

## Toolbox Training

Our Toolbox Training Courses are a series of specialised programs designed to equip participants with the skills and knowledge needed for the effective operation, maintenance, and safety of Dennis Eagle vehicles and equipment.

These courses offer in-depth training on various components and systems, including bin lifts, vehicle bodies, steering mechanisms, and more.

Each module combines theoretical instruction with practical, hands-on learning to ensure participants are well-prepared to handle real-world scenarios with confidence and expertise. Whether you are an operator, technician, or fleet manager, the Toolbox Training Courses provide the essential tools to enhance performance, safety, and efficiency in your day-to-day operations.

# MEET OUR TRAINING EXPERT

As Learning & Development Officer at Dennis Eagle, I'll be your point of contact for booking training courses, so I'd like to say hello and welcome to all of our customers looking to further their training.

Our commitment to a customer-first culture means we are dedicated to delivering a high-quality training experience each and every time. We're very proud of our Dennis Eagle refuse collection vehicles, and we want you to get the most out of them.

That's why we have a number of experienced Dennis Eagle trainers across the country, who are skilled in instructing your operatives on how to use your vehicle in a safe and correct manner, and providing your staff with the skills to recognise faults and carry out repairs and maintenance safely and efficiently.

If you have any questions, please contact me directly on [customertraining@dennis-eagle.co.uk](mailto:customertraining@dennis-eagle.co.uk) or call **01926 458 500**.
