<b>Subject:</b>	Elite 6 Brake Roller Test DTP Reference Numbers 7842 and 7645
-----------------	---

We have recently had issues regarding the correct DTp numbers for Dennis Elite vehicles when carrying out brake roller tests.

When the DTp brake roller test reference number 7842 is used it shows up as a DAF and when 7645 is used it does not show a test for the secondary brake.

After consulting with the DVSA we have been informed that although 7842 is allocated to DAF it will still test a Dennis vehicle correctly.

When 7645 is used it will also test the vehicle correctly as the designated secondary brake is the service brake split system.
