Elite 6 ETS Rear and Mid Steer Axle Bracket Bolt Torque

Dennis Eagle recommend on your vehicle`s next six weekly safety inspection that bolts on the ETS mid or rear steer spring hangers are physically torqued to 120Nm.

All bolts are part number DEP104208 apart from the three bolts clearly marked in Fig. 1, these are DEP104207, all nuts are DEP104234.

If upon checking you require any bolts/nuts these will be free issued by Dennis Eagle, to obtain these contact your local Service Centre quoting the relevant chassis number, part number, quantities required and delivery address.
