Date:	24/04/25	Sheet:	Page 1 of 1

**SUBJECT:** Genuine Oil Filters incorrect to OE specification supplied by third party supplier

Dennis Eagle always recommends fitting genuine spare parts that meet our OE Specification. Recent events brought to our attention, where a third-party parts supplier provided the incorrect specification oil filter, resulted in catastrophic engine failure.

Fig. 1 below shows an incorrect engine oil filter that has failed within a couple of days after fitment, the filter sealing ring failed which led to low oil pressure on the truck.

Low oil pressure can soon lead to a catastrophic failure of the engine.

Fig. 1

To ensure you fit the correct filter always speak with a Dennis Eagle Parts specialist by calling 01926 458555 .
